## PROJECTS

### [Developed APIs with Node.js and Express.js for Shopyyglobe ↗](#)

Aug 2025 - Sep 2025

- Developed backend using Node.js, Express.js, and MongoDB for scalable data handling and API integration.
- Created RESTful APIs for product listing, user registration, authentication, and cart management.
- Implemented JWT-based token authentication for secure user sessions and system access.

### [ShopyGlobe E-commerce Application ↗](#)

May 2025 - Aug 2025

- Built ShopyGlobe e-commerce platform with React, React Router, and Redux for responsive UI and state management.
- Integrated API for dynamic product data fetching and real-time updates.
- Optimized performance and responsiveness across devices for a fast, engaging shopping experience.

### [Personal Portfolio Website ↗](#)

Dec 2024 - Jan 2025

- Created a personal portfolio website using HTML and CSS to showcase skills, projects, and achievements.
- Designed a clean, responsive layout with effective navigation and UI elements.
- Enhanced professional presence through structured design and cross-device accessibility.

### SKILLS

- HTML
- CSS
- JavaScript
- GitHub
- Tailwind CSS
- React
- Node.js
- Express.js
- MongoDB
- Time Management
- Decision making

### ADDITIONAL DETAILS

- Completed an Advanced Diploma in Computer Applications, gaining proficiency in fundamental computer science concepts, MS Office, and Tally Prime, thereby strengthening the technical foundation.
- Earned certification in Web Development with real-time project training, including building a Stack Overflow-like platform, through NULLCLASS.

### [Developed YouTube-Inspired Platform ↗](#)

Sep 2025

- Built a YouTube clone using the MERN stack with video upload, playback, and responsive UI features.
- Implemented JWT-based authentication for secure user registration, login, and session management.
- Developed video management, user interactions (likes, dislike, comments), subscriptions, search, and personalized recommendations.

### [Weather Forecast Application ↗](#)

Mar 2025

- Built a responsive weather app with real-time forecasts and location-based data display.
- Used asynchronous API requests and dynamic DOM updates for live weather conditions.
- Utilized JavaScript for efficient data handling and interactive user experience across devices.
